

FLEXSTOR AUGERVAC

Scan with your smart phone to view a video on this product.

Industry's Heaviest Constructed Fan / Auger Grain Vac!

SAVE MONEY!

The AugerVac was designed to make it affordable for everyone.

SAVE YOUR HEALTH!

The new super lightweight flexible hose makes bin unloading easy and eliminates the back-breaking job of shoveling grain. Your lungs will breathe easier with the dust-free grain transfer.

SAVE TIME!

High capacities enable you to quickly and safely clean out your grain bins.

Backed By Over 50 Years Of Pneumatic Manufacturing Experience.

The exclusive cyclonic inlet design separates the dust and is gentler on the grain.

Low maintenance single stage fan assembly produces high vacuum for easy clean out.

Standard hydraulic cylinder is used to raise the 10" Auger.

Low maintenance with banded belts.

FLEXSTOR AUGER VAC

Industry's Heaviest Constructed Fan / Auger Grain Vac!

FEATURES

Single stage fan assembly produces high vacuum for easy clean out.

Wide heavy chassis. No need to adjust the wheel base like other machines.

Double auger flighting gives you a higher capacity and longer life to the lower section.

PTO powered, 1000 RPM.

Hydraulic cylinder raises the auger easily without dangerous springs.

Exclusive to the AugerVac, the damper valve minimizes the load on your power source.

Exclusive design cyclonic inlet minimizes fan dust ingestion, making it gentler on grain.

Easy maintenance with one-piece banded belt.

SPECIFICATIONS

Gross Weight	3,000 lbs.
Height / Raised Auger	13' 10" (166")
Height / Transport Position	9' 9" (117")
Overall Width	8' 5" (101")
Width - Outside Tire	7' 11" (95")
Overall Length	14' 2" (170")
PTO Shaft	1-3/8", 21 Spline, 1000 RPM
Auger Diameter	10"
